

1831 Census  
Rawdon Township, L'Assomption County, Lower Canada  
Philémon Dugas, enumerator: September 29, 1831  
Microfilm LAC C722  
transcribed and edited by Daniel B. Parkinson

Material, in columns 2 - 4, is listed in same order as on the census.

Column 1, number of acres (a lot = 200 acres, most grants were a half lot or 100 acres)

Column 2, Range and Lot Location, as given on census

- sic = as given but does not agree with other data

Column 3, name of family head, as given on census

- ? = Could be. I am unable to decipher name with certainty

Column 4, ownership

- P = Propriétaire: A patent had been obtained or was applied for. A "P" with no patent date indicates:
  - I. the owner may have purchased lot from a grantee
  - II. an error, the resident not eligible for a patent & does not appear in Grants Book or was renting
- NP = Non Propriétaire: the resident was a tenant. Some residents are incorrectly marked NP as by their patent date, they obviously tickets of location.

Column 5, occupation

Column 6, corrected lot number from Grants Book

Column 7, number in family

Column 8, corrected name using Grants Book, other sources

- ? = Could be. The corrected spelling may still be incorrect.

Column 9, comments

- \* = The number of acres recorded at this location is in excess of the 200 acre lot size.
- patent date = the year letters patent (deed for crown grant) was issued

**page 1113**
